MD RAKIBUL ISLAM

Khulna, Bangladesh
Email: rakibul2010islam@gmail.com   Portfolio: www.rakibul2010islam.com

Self-taught and energetic Front-end developer is looking for an entry level position to expand professional experience and contribute to achieve the company's goals in the best possible way.

EXPERIENCE

MAY 2019 – JUNE 2019
PERSONAL PROJECTS

After completing my portfolio website and other small projects, I have started building some other websites as personal project and completed building 5 websites within a few weeks where I used CSS Flexbox, Grid System for the layout, Media Queries for different devices and some simple JS codes. I also used Sass to organize the CSS codes and Github repositories for storing the projects and keeping track of all the changes.

During these projects I faced a lot of problems and solved almost all of them either by myself or by getting a solution from online. This really gives me the strength and confidence to do a better job for the future projects.

APRIL 2011 – DECEMBER 2018
FREELANCE GRAPHICS EDITOR, FREELANCER, UPWORK ETC.

Have completed more than 500 projects successfully with a feedback score of 5.0 out of 5.0 (80% projects).
